FORM 6-K (Report of Foreign Issuer)

Filed 03/28/12 for the Period Ending 03/26/12

Telephone	4169471212
CIK	0000002809
Symbol	AEM
SIC Code	1040 - Gold And Silver Ores
Industry	Gold & Silver
Sector	Basic Materials
Fiscal Year	12/31

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION**

Washington, D.C. 20549

Form 6-K

**REPORT OF FOREIGN PRIVATE ISSUER PURSUANT TO RULE 13a-16 OR 15d-16 UNDER THE
SECURITIES EXCHANGE ACT OF 1934**

For the month March, 2012

Commission File Number

AGNICO-EAGLE MINES LIMITED

(Translation of registrant's name into English)

145 King Street East, Suite 400, Toronto, Ontario M5C 2Y7

(Address of principal executive office)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F. Form 20-F Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101 (b)(1):

Note: Regulation S-T Rule 101 (b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101 (b)(7):

Note: Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's "home country"), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934. Yes No

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82- .

EXHIBITS

<u>Exhibit No.</u>	<u>Exhibit Description</u>
1	Press Release dated March 26, 2012 announcing the Corporation's release of the new technical report on Meadowbank Mine confirming new reserves and resources statement.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

AGNICO-EAGLE FILES NEW TECHNICAL REPORT ON MEADOWBANK MINE CONFIRMING NEW RESERVES AND RESOURCES STATEMENT

TORONTO (March 26, 2012) - Agnico-Eagle Mines Limited (“Agnico-Eagle” or the “Company”) today announced the release of a technical report that summarizes all material scientific and technical information about the Meadowbank mine including the new mineral resources and reserves data as of December 31, 2011. In a press release dated February 15, 2012, the Company announced a new statement of the Meadowbank resources and reserves, based on a new life of mine plan completed in January 2012. The new statement was confirmed in a technical report filed by the Company on March 23, 2012, which was compliant with the Canadian Securities Administrators’ National Instrument 43-101 (“NI 43-101”). The report entitled “Technical Report on the Mineral Resources and Mineral Reserves at Meadowbank Gold Mine, Nunavut, Canada as at December 31, 2011” may be found at www.sedar.com.

Detailed Mineral Reserve and Resource Data

The following table sets out the gold reserves and resources at the Meadowbank mine as of December 31, 2011*:

Category	Grade (g/t gold)	Gold (000s oz)	Tonnes (000s)
Proven Reserve (open pit)	1.49	92	1,931
Probable Reserve (open pit)	2.91	2,109	22,563
Total Proven and Probable Reserve	2.79	2,201	24,494
Indicated Resource (open pit)	1.99		14,872
Indicated Resource (underground)	4.85		2,341
Total Indicated Resource	2.38		17,213
Inferred Resource (open pit)	3.03		1,532
Inferred Resource (underground)	4.36		2,213
Total Inferred Resource	3.81		3,745

* Tonnage amounts and contained metal amounts presented in this table have been rounded to the nearest thousand. Reserves are not a sub-set of resources.

About Agnico-Eagle

Agnico-Eagle is a long established, Canadian headquartered, gold producer with operations located in Canada, Finland and Mexico, and exploration and development activities in Canada, Finland, Mexico and the United States. The Company has full exposure to higher gold prices consistent with its policy of no forward gold sales and maintains a corporate strategy based on increasing shareholders exposure to gold, on a per share basis. It has declared a cash dividend for 30 consecutive years.

Forward-Looking Statements

The information in this news release has been prepared as at March 26, 2012. Certain statements contained in this press release constitute “forward-looking statements” within the meaning of the United States Private Securities Litigation Reform Act of 1995 and “forward looking information” under the provisions of Canadian provincial securities laws and are referred to herein as “forward-looking statements”. When used in this document, words such as “anticipate”, “expect”, “estimate,” “forecast,” “planned”, “will”, “likely”, “schedule” and similar expressions are intended to identify forward-looking statements.

Such statements include without limitation: the Company’s forward-looking production guidance, including estimated ore grades, project timelines, drilling results, orebody configurations, metal production, life of mine, commencement of production estimates, the estimated timing of scoping and other studies, recovery rates, mill throughput, and projected exploration and capital expenditures, including costs and other estimates upon which such projections are based; the Company’s goal to increase its mineral reserves and resources; and other statements and information regarding anticipated trends with respect to the Company’s operations, exploration and the funding thereof. Such statements reflect the Company’s views as at the date of this press release and are subject to certain risks, uncertainties and assumptions. Forward-looking statements are necessarily based upon a number of factors and assumptions that, while considered reasonable by Agnico-Eagle as of the date of such statements, are inherently subject to significant business, economic and competitive uncertainties and contingencies. The factors and assumptions of Agnico-Eagle contained in this news release, which may prove to be incorrect, include, but are not limited to, the assumptions set forth herein and in management’s discussion and analysis and the Company’s Annual Report on Form 20-F for the year ended December 31, 2010 (“Form 20-F”) as well as: that there are no significant disruptions affecting operations, whether due to labour disruptions, supply disruptions, damage to equipment, natural occurrences, equipment failures, accidents, political changes, title issues or otherwise; that permitting, production and expansion at each of Agnico-Eagle’s mines and growth projects proceeds on a basis consistent with current expectations, and that Agnico-Eagle does not change its plans relating to such projects; that the exchange rate between the Canadian dollar, European Union euro, Mexican peso and the United States dollar will be approximately consistent with current levels or as set out in this news release; that prices for gold, silver, zinc, copper and lead will be consistent with Agnico-Eagle’s expectations; that prices for key mining and construction supplies, including labour costs, remain consistent with Agnico-Eagle’s current expectations; that Agnico-Eagle’s current estimates of mineral reserves, mineral resources, mineral grades and metal recovery are accurate; that there are no material delays in the timing for completion of ongoing growth projects; that the Company’s

current plans to optimize production are successful; and that there are no material variations in the current tax and regulatory environment. Many factors, known and unknown, could cause the actual results to be materially different from those expressed or implied by such forward-looking statements. Such risks include, but are not limited to: the volatility of prices of gold and other metals; uncertainty of mineral reserves, mineral resources, mineral grades and metal recovery estimates; uncertainty of future production, capital expenditures, and other costs; currency fluctuations; financing of additional capital requirements; cost of exploration and development programs; mining risks; risks associated with foreign operations; governmental and environmental regulation; the volatility of the Company's stock price; and risks associated with the Company's byproduct metal derivative strategies. For a more detailed discussion of such risks and other factors, see the Form 20-F, as well as the Company's other filings with the Canadian Securities Administrators and the U.S. Securities and Exchange Commission (the "SEC"). The Company does not intend, and does not assume any obligation, to update these forward-looking statements and information, except as required by law. Accordingly, readers are advised not to place undue reliance on forward-looking statements. Certain of the foregoing statements, primarily related to projects, are based on preliminary views of the Company with respect to, among other things, grade, tonnage, processing, recoveries, mining methods, capital costs, total cash costs, minesite costs, and location of surface infrastructure. Actual results and final decisions may be materially different from those currently anticipated.

Notes to Investors Regarding the Use of Resources

Cautionary Note to Investors Concerning Estimates of Measured and Indicated Resources

This news release uses the terms "measured resources" and "indicated resources". We advise investors that while those terms are recognized and required by Canadian regulations, the SEC does not recognize them. **Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves .**

Cautionary Note to Investors Concerning Estimates of Inferred Resources

This press release also uses the term "inferred resources". We advise investors that while this term is recognized and required by Canadian regulations, the SEC does not recognize it. "Inferred resources" have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases. **Investors are cautioned not to assume that part or all of an inferred resource exists, or is economically or legally mineable.**

Scientific and Technical Data

Agnico-Eagle Mines Limited is reporting mineral resource and reserve estimates in accordance with the CIM guidelines for the estimation, classification and reporting of resources and reserves.

Cautionary Note To U.S. Investors - The SEC permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. Agnico-Eagle uses certain terms in this press release, such as “measured”, “indicated”, and “inferred”, and “resources” that the SEC guidelines strictly prohibit U.S. registered companies from including in their filings with the SEC. U.S. investors are urged to consider closely the disclosure in our Form 20-F, which may be obtained from us, or from the SEC’s website at: <http://sec.gov/edgar.shtml>. A “final” or “bankable” feasibility study is required to meet the requirements to designate reserves under Industry Guide 7.

Estimates for all properties were calculated using historic three-year average metals prices and foreign exchange rates in accordance with the SEC Industry Guide 7. Industry Guide 7 requires the use of prices that reflect current economic conditions at the time of reserve determination, which the Staff of the SEC has interpreted to mean historic three-year average prices. The assumptions used for the mineral reserves and resources estimates reported by the Company on February 15, 2012 were based on three-year average prices for the period ending December 31, 2011 of \$1,255 per ounce gold, \$23.00 per ounce silver, \$0.91 per pound zinc, \$3.25 per pound copper, \$0.95 per pound lead and C\$/US\$, US\$/Euro and MXP/US\$ exchange rates of 1.05, 1.37 and 12.86, respectively.

The Canadian Securities Administrators’ National Instrument 43-101 (“NI 43-101”) requires mining companies to disclose reserves and resources using the subcategories of “proven” reserves, “probable” reserves, “measured” resources, “indicated” resources and “inferred” resources. Mineral resources that are not mineral reserves do not have demonstrated economic viability.

A mineral reserve is the economically mineable part of a measured or indicated mineral resource demonstrated by at least a preliminary feasibility study. This study must include adequate information on mining, processing, metallurgical, economic and other relevant factors that demonstrate, at the time of reporting, that economic extraction can be justified. A mineral reserve includes diluting materials and allows for losses that may occur when the material is mined. A proven mineral reserve is the economically mineable part of a measured mineral resource demonstrated by at least a preliminary feasibility study. A probable mineral reserve is the economically mineable part of an indicated, and in some circumstances, a measured mineral resource demonstrated by at least a preliminary feasibility study.

A mineral resource is a concentration or occurrence of natural, solid, inorganic material, or natural, solid fossilized organic material including base and precious metals in or on the Earth’s crust in such form and quantity and of such a grade or quality that it has reasonable prospects for economic extraction. The location, quantity, grade, geological characteristics and continuity of a mineral resource are known, estimated or interpreted from specific geological evidence and knowledge. A measured mineral resource is that part of a mineral resource for which quantity, grade or quality, densities, shape and physical characteristics are so well established that they can be estimated with confidence sufficient to allow the appropriate application of technical and economic parameters, to support production planning and evaluation of the economic viability of the deposit. The estimate is based on

detailed and reliable exploration, sampling and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes that are spaced closely enough to confirm both geological and grade continuity. An indicated mineral resource is that part of a mineral resource for which quantity, grade or quality, densities, shape and physical characteristics can be estimated with a level of confidence sufficient to allow the appropriate application of technical and economic parameters, to support mine planning and evaluation of the economic viability of the deposit. The estimate is based on detailed and reliable exploration and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes that are spaced closely enough for geological and grade continuity to be reasonably assumed. An inferred mineral resource is that part of a mineral resource for which quantity and grade or quality can be estimated on the basis of geological evidence and limited sampling and reasonably assumed, but not verified, geological and grade continuity. The estimate is based on limited information and sampling gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes. Mineral resources which are not mineral reserves do not have demonstrated economic viability.

Investors are cautioned not to assume that part or all of an inferred resource exists, or is economically or legally mineable.

A feasibility study is a comprehensive technical and economic study of the selected development option for a mineral project that includes appropriately detailed assessments of realistically assumed mining, processing, metallurgical, economic, marketing, legal, environmental, social and governmental considerations together with any other relevant operational factors and detailed financial analysis, that are necessary to demonstrate at the time of reporting that extraction is reasonably justified (economically mineable). The results of the study may reasonably serve as the basis for a final decision by a proponent or financial institution to proceed with, or finance, the development of the project. The confidence level of the study will be higher than that of a Pre-Feasibility Study.

The mineral reserves presented in this disclosure are separate from and not a portion of the mineral resources.
